## Cities, Networks, and Global Environmental Governance ...

Hierarchical analysis of 256 cities in 118 countries suggests that the degree of cities' globalization, or their level of "global cityness," is positively associated with the cities' membership in the global networks. The level of individual cities' integration into the international economy and transportation grid is crucial for sharing ideas of global environmental responsibility.

## Environmental Problems of Modern Cities

For 3 decades the Healthy Cities movement has been a pioneering driver of change, creating healthier urban settings that support the health and well-being of the people that use them. It has also inspired Healthy Cities networks to blossom in all other WHO regions creating a global push for healthy cities. The network will celebrate the past 30 years with an eye on the future, recognizing that cities are playing a critical role socially, culturally and politically.
