Entrepreneurship is a fundamental business discipline and a phenomenon that drives economic growth globally. This shortform textbook focuses on the absolute essential elements of the field, covering theory and practice. Illuminating the development of entrepreneurship, the author also concise introduces the entrepreneurial personality and some of the additional hurdles faced by female and minority entrepreneurs. The central role of creativity, innovation and culture are also examined as well as entrepreneurial strategies for finance and marketing. This short text provides a unique expert overview for students of entrepreneurship, whilst the practical insights will also be useful in applications for budding entrepreneurs

This book covers the practical aspects of database design, data cleansing, data analysis, and data protection, among others. The focus is on what you really need to know to create the right database for your small business and to leverage it most effectively to spur growth and revenue. Databases for Small Business is a practical handbook for entrepreneurs, managers, staff, and professionals in small organizations who are not IT specialists but who recognize the need to ramp up their small organizations' use of data and to round out their own business expertise and office skills with basic database proficiency. Anna Manning—a data scientist who has worked on database design and data analysis in a computer science university research lab, her own small business, and a nonprofit—walks you through the progression of steps that will enable you to extract actionable intelligence and maximum value from your business data in terms of marketing, sales, customer relations, decision making, and business strategy. Dr. Manning illustrates the steps in the book with four running case studies of a small online business, an engineering startup, a small legal firm, and a nonprofit organization. Databases for Small Business teaches non-techie entrepreneurs and professionals how to: Design a small business database from scratch Extract the maximum profit from your data Follow guidance on data protection law Effectively use data collection and data cleansing techniques Train staff to leverage your data
