In Writing Anthropology, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors. Why are human food habits so diverse? Why do Americans recoil at the thought of dog meat? Jews and Moslems, pork? Hindus, beef? Why do Asians abhor milk? In Good to Eat, best-selling author Marvin Harris leads readers on an informative detective adventure to solve the worlds major food puzzles. He explains the diversity of the worlds gastronomic customs, demonstrating that what appear at first glance to be irrational food tastes turn out really to have been shaped by practical, economic, or political necessity. In addition, his smart and spirited treatment sheds wisdom on such topics as why there has been an explosion in fast food, why history indicates that its bad to eat people but good to kill them, and why children universally reject spinach. Good to Eat is more than an intellectual adventure in food for thought. It is a highly readable, scientifically accurate, and fascinating work that demystifies the causes of myriad human cultural differences.

Quantitative Anthropology: A Workbook contributes an anthropological perspective to quantitative methods. The book's authors address characteristics of quantitative data, entering and manipulating data in SPSS, graphical displays, distributions and measures of central tendency and dispersion, and including hypothesis testing with both parametric and nonparametric statistical tests. Increasingly complex exercises build on cumulative learning from chapter to chapter and stress the application of methods beyond coursework. The focus of the manual is on univariate statistical analysis, and the book is written to be accessible to higher level undergraduate students and graduate students in all fields of anthropology. Uses anthropological examples (from the subdisciplines of sociocultural anthropology, biological anthropology, and archaeology) to illustrate quantitative data techniques Integrates quantitative techniques with theoretical fluency, encouraging the reader to make connections between Big Picture questions in anthropology and the methods used to address those questions Focuses on the practical use of Excel and SPSS to apply quantitative methods to anthropological contexts Includes exercises in both parametric and nonparametric inferential statistics, as well as descriptive statistics

*This paper is important in the rapidly increasing preoccupation of American archeologists with the basic theories of their discipline. . . . An excellent example of how basic descriptive data can be used.*ÑAmerican Anthropologist

From ingredients and recipes to meals and menus across time and space, this highly engaging overview illustrates the important roles that anthropology and anthropologists play in understanding food and its key place in the study of culture. The new edition, now in full colour, introduces discussions about nomadism, commercializing food, food security, and ethical consumption, including treatment of animals and the long-term environmental and health consequences of meat consumption. New feature boxes offer case studies and exercises to help highlight anthropological methods and approaches, and each chapter includes a further reading section. By considering the concept of cuisine and public discourse, Eating Culture brings order and insight to our changing relationship with food.

Crumpled Paper Boat is an exploration of the possibilities and limits of a literary anthropology that bends the conventions of ethnographic voice and form to engage with writing as a material practice rather than a transparent representational medium.

Using the influential and field-changing Writing Culture as a point of departure, the thirteen essays in Writing Culture and the Life of Anthropology address anthropology's past, present, and future. The contributors, all leading figures in anthropology today, reflect back on the "writing culture" movement of the 1980s, consider its influences on ethnographic research and writing, and debate what counts as ethnography in a post-Writing Culture era. They address questions of ethnographic method, new forms the presentation of research might take, and the anthropologist's role. Exploring themes such as late industrialism, precarity, violence, science and technology, globalization, and the non-human world, this book is essential reading for those looking to understand the current state of anthropology and its possibilities going forward. Contributors. Anne Allison, James Clifford, Michael M.J. Fischer, Kim Fortun, Richard Handler, John L. Jackson, Jr., George E. Marcus, Charles Piot, Hugh Raffles, Danielyn Rutherford, Orin Starn, Kathleen Stewart, Michael Taussig, Kamala Visweswaran

Advanced advice for students who want to read, write and learn about social sciences in preparation for a career in that field.

Theoretical Anthropology is a major contribution to the historical and critical study of the assumptions underlying the development of modern cultural anthropology. In the new introduction, Martin Bidney discusses the present state of anthropology and contrasts it with the scene surveyed in Theoretical Anthropology. He discusses the relevance of David Bidney's work to our present concerns. Also included in this work is the second edition's introductory essay by David Bidney, written fifteen years after the first edition of Theoretical Anthropology. Here the author examines his original aims in writing this book. Theoretical Anthropology has helped to create among anthropologists the present climate of theoretical self-awareness and broad humanistic concerns. It has become a standard reference work for anthropologists as well as sociologists.
