This book begins with you working along as Scott Guthrie builds a complete ASP.NET MVC reference application. He begins NerdDinner by using the File->New Project menu command within Visual Studio to create a new ASP.NET MVC Application. You'll then incrementally add functionality and features. Along the way you'll cover how to create a database, build a model layer with business rule validations, implement listing/details data browsing, provide CRUD (Create, Update, Delete) data form entry support, implement efficient data paging, reuse UI using master pages and partials, secure the application using authentication and authorization, use AJAX to deliver dynamic updates and

interactive map support, and implement automated unit testing. From there, the bulk of the rest of the book begins with the basic concepts around the model view controller pattern, including the little history and the state of the MVC on the web today. We'll then go into the ways that MVC is different from ASP.NET Web Forms. We'll explore the structure of a standard MVC application and see what you get out of the box. Next we dig deep into routing and see the role URLs play in your application. We'll deep dive into controllers and views and see what role the Ajax plays in your applications. The last third of the book focuses entirely on advanced techniques and extending the framework. In some places, we assume that you're somewhat familiar with ASP.NET WebForms, at least peripherally. There are a lot of ASP.NET WebForms developers out there who are interested in ASP.NET MVC so there are a number of places in this book where we contrast the two technologies. Even if you're not already an ASP.NET developer, you might still find these sections interesting for context, as well as for your own edification as ASP.NET MVC may not be the web technology that you're looking for.

"Michael Adams's book is great fun! No one intends to make a truly bad movie, but when they do, Michael Adams will be there to watch it...and make it entertaining!" —John Landis, director of Trading Places and The Blues Brothers In Showgirls, Teen Wolves, and Astro Zombies, film critic Michael Adams embarks on a year-long odyssey to discover the worst movie ever made, which Mystery Science Theater 3000 star, writer, and director Kevin Murphy calls "disturbingly comprehensive, joyously critical, and the best of its kind." From all-time cult classics such as Reefer Madness and Plan 9 from Outer Space to new entries to the pantheon such as Gigli and Baby Geniuses, no genre, star, or director is safe from Adams's acerbic wit and hilarious observations. In the vein of A.J. Jacobs's New York Times bestselling book The Know-It-All, and with the snarky sarcasm of television's Mystery Science Theater 3000 and The Soup, Showgirls, Teen Wolves, and Astro Zombies leaves no stone unturned. With a foreword by cult director George A. Romero (Night of the Living Dead and Dawn of the Dead).

Hold tight as you are thrown into New York City's deep and dark underworld, in this exciting new play on the Abbey stage. Man has just set foot on the moon. The streets of Brooklyn are tense. Anita Lahey's second collection, *Spinning Side Kick*, is a hard-knuckled look at the other half. These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is slangy and quick, punctuated with jabs. She eyes those moments—in a day, in a life—when the normal clues we rely on disappear, shifting the line between domesticity and danger. In *Spinning Side Kick*, a talented poet returns with sharper aim.
