Materials and the Environment:

Eco-Informed Material Choice,

Second Edition, is the first book

devoted solely to the

environmental aspects of

materials and their selection,

production, use and disposal, by

one of the world's foremost

materials authorities. It explores

human dependence on materials

and its environmental

consequences and provides

perspective, background,

methods, and data for thinking

about and designing with

materials to minimize their

environmental impact.

Green building (also known as green construction or sustainable building) refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction, operation, maintenance, renovation, and demolition. This requires close cooperation of the contractor, the architects, the ...
