It is a short autobiography. We all liked the fact that it started with Jane's life as a young girl and then detailed how she ended up working with chimps. It also discussed her life with the chimps in detail, how she set up camp (her mother stayed with her at first, which I think is a charming detail) and various adventures that she had.

they live in groups and communities. Babies sleep with their mothers until age five or six. What was Jane's most well known finding about chimpanzees behavior? Chimpanzees make and use tools. Definition of vanished. disappeared. Definition of miserable. unhappy or uncomfortable.

The well-known English zoologist describes her early interest in animals and how this led to her study of chimpanzees at the Gombe Stream Reserve in Tanzania.

The celebrated naturalist recounts her childhood wish to work with animals and her excursions into the wilds of Africa, where she performed history-making studies on the leopards, lions, and, especially, chimpanzees there. Simultaneous.

The renowned British primatologist continues the "engrossing account" of her time among the chimpanzees of Gombe, Tanzania (Publishers Weekly). In her classic, *In the Shadow of Man*, Jane Goodall wrote of her first ten years at Gombe. In *Through a Window* she continues the story, painting a more complete and vivid portrait of our closest relatives. On the shores of Lake Tanganyika, Gombe is a community where the principal residents are chimpanzees. Through Goodall's eyes we watch young Figan's relentless rise to power and old Mike's crushing defeat. We learn how one mother rears her children to succeed and another dooms hers to failure. We witness horrifying murders, touching moments of affection, joyous births, and wrenching deaths. As Goodall compellingly tells the story of this intimately intertwined community, we are shown human emotions stripped to their essence. In the mirror of chimpanzee life, we see ourselves reflected. "A humbling and exalting book . . . Ranks with the great scientific achievements of the twentieth century." "The Washington Post "[An] absolutely smashing account . . . Thrilling, affectionate, intelligent" a classic." "Kirkus Reviews, starred review

From the time she was a girl, Jane Goodall dreamed of a life spent working with animals. Finally she had her wish. When she was twenty-six years old, she ventured into the forests of Africa to observe chimpanzees in the wild. On her expeditions she braved the dangers with leopards and lions in the African bush. And she got to know an amazing group of wild chimpanzees -- intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own.

This book traces out the life and career of Jane Goodall as a watcher of English fauna to her adult work as scholar of animal behavior in Africa.

'One of history's most impressive field studies; an instant animal classic' TIME Jane Goodall's classic account of primate research provides an impressively detailed and absorbing account of the early years of her field study of, and adventures with, chimpanzees in Tanzania, Africa. It is a landmark for everyone to enjoy.

"This biography for children will trace Goodall's life, but each chapter will also focus on two or more the chimpanzees that she observed, with information in sidebars about these particular animals. Along with biographical details, the book will explore the ethical issues that surround Goodall's work and show what has changed in our understanding of Great Apes. What do we know today about these animals in terms of language, speech, tool use, and DNA? How has sophisticated technology - GPS systems, Satellite imagery, portable digital microphones - been used to gain new information about animal populations."--

Lavishly illustrated with more than eighty full-color photographs, a moving, personal account of the author's findings about the socialization of these endangered animals is intended to increase awareness about the need to protect the chimpanzees.

British naturalist Jane Goodall provides an intimate portrait of a group of chimpanzees in the jungles of Africa which she has studied for many years.
