Whether you're taking the CPHIMS exam, or simply want the most current and comprehensive overview in healthcare information and management systems today?this updated publication has it all. But for those preparing for the CPHIMS exam, this text book is an ideal study partner.
--

This book is the ideal resource for those preparing for the CAHIMS Certifi cation Exam—or looking for a comprehensive 'health IT 101' guide. Content is divided into three topic categories: organizational and technology environments; systems analysis, design, selection, implementation, support, maintenance, testing, evaluation, privacy and security; and leadership and management support. Each chapter includes learning objectives for tracking progress in understanding and articulating the content. Practice exam questions at the end of the book reinforce key concepts explored throughout the book. It also features a glossary of acronyms used throughout the book for easy reference during exam preparation and 'on the job' reference after certification.
--

Whether you're taking the CPHIMS exam, or simply want the most current and comprehensive overview in healthcare information and management systems today - this completely revised and updated third edition has it all. But for those preparing for the CPHIMS exam, this book is an ideal study partner. Whether you're taking the CPHIMS exam, or simply want the most current and comprehensive overview in healthcare information and management systems today - this completely revised and updated fourth edition has it all. But for those preparing for the CPHIMS exam, this book is an ideal study partner. The content reflects the exam content outline covering healthcare and technology environments; systems analysis, design, selection, implementation, support, maintenance, testing, evaluation, privacy and security; and administration leadership management. Candidates can challenge themselves with the sample multiple choice questions at the end of the book. The benefits of CPHIMS certification are broad and far reaching. Certification is a process that is embraced in many industries, including healthcare IT. CPHIMS is recognized as the 'gold standard' in healthcare IT because it is developed by HIMSS, has a global focus, and is valued by clinicians and non-clinicians, management and staff positions, and technical and nontechnical individuals. Certification, specifically CPHIMS certification, provides a means by which employers can evaluate potential new hires, analyze job performance, evaluate employees, market IT services, and motivate employees to enhance their skills and knowledge. Certification also provides employers with evidence that the certificate holders have demonstrated an established level of job-related knowledge, skills, and abilities and are competent practitioners of healthcare IT.
