Utilities around the world are under increasing pressure to provide reliable and good quality power supply to their retail customers, and to reduce their operational costs. These concerns call for real time monitoring and control of the distribution system, which can be accomplished by deploying distribution automation (DA) systems, a key enabling technology for smart grids. This book provides a detailed description of all the major components of a DA system, including communication infrastructure and analysis tools. Topics covered include communication systems for distribution automation; load flow analysis; short circuit analysis; state estimation; feeder reconfiguration for loss reduction, service restoration, and load balancing; volt-var control; fault location; fault type identification; and economic analysis/cost benefit analysis. Concluding with an international case study (Enexis, one of the major Distribution System Operators in The Netherlands) showing how DA has been implemented in practice, this book is essential reading for researchers and advanced students working in power engineering and practitioners engaged in distribution automation, such as utility engineers, vendors, and consultants.

Constitutional Patriotism offers a new theory of citizenship and civic allegiance for today's culturally diverse liberal democracies. Rejecting conventional accounts of liberal nationalism and cosmopolitanism, Jan-Werner Müller argues for a form of political belonging centered on universalist norms, adapted for specific constitutional cultures. At the same time, he presents a novel approach to thinking about political belonging and the preconditions of democratic legitimacy beyond the nation-state. The book takes the development of the European Union as a case study, but its lessons apply also to the United States and other parts of the world. Müller's essay starts with an engaging historical account of the origins and spread of the concept of constitutional patriotism—the idea that political attachment ought to center on the norms and values of a liberal democratic constitution rather than a national culture or the "global human community." In a more analytical part, he then proposes a critical conception of citizenship that makes room for dissent and civil disobedience while taking seriously a polity's need for stability over time. Müller's theory of constitutional patriotism responds to the challenges of the de facto multiculturalism of today's states—with a number of concrete policy implications about immigration and the preconditions for citizenship clearly spelled out. And it asks what civic empowerment could mean in a globalizing world.

"An eerie, tense, and finely written novel...Readers will grip their chairs" (SFGate.com) as they try to unravel this tale of psychological suspense from the award-winning New York Times bestselling author of Turn of Mind. Jane loses everything when her teenage daughter is killed in a senseless accident. Devastated, she manages to make one tiny stab at a new life: she moves from San Francisco to the seaside town of Half Moon Bay. Jane is inconsolable, and yet, as the months go by, she is able to cobble together some version of a job, of friends, of the possibility of peace. And then, children begin to disappear. And soon, Jane sees her own pain reflected in all the parents in the town. She wonders if she will be able to live through the aching loss, the fear all around her. And as the disappearances continue, she begins to see that what her neighbors are wondering is if it is Jane herself who has unleashed the horror of loss. Alice LaPlante's "well-crafted novel of psychological suspense" is a chilling story about a mother haunted by her past, a "brooding suspense novel...dark, starkly beautiful...LaPlante uses a seductively dangerous landscape to mirror her heroine's inner life" (Kirkus Reviews).
