Sevenoaks School: Entrance Tests

Candidates who attend a UK prep school may be put forward by their school. The scholarship exams are taken over two days in the May of the year of entry. Candidates are tested in Science, Humanities (History and Geography), a general paper and a Modern Language from French, German, Spanish or Mandarin, offered either as native or second languages.

Sevenoaks School: Academic

The entrance assessment takes place in the April of Year 7. All candidates take an English and a Maths Test (past papers are available here), a Verbal Reasoning Test, and they take part in a 40-minute group interview. We also request a reference from their school. Unconditional offers are made in the June of Year 7.

Recent years have generated a huge increase in the number of research and scholarly works concerned with teachers and teaching, and this effort has generated new and important insights that are crucial for understanding education today. This handbook provides a host of chapters, written by leading authorities, that review both the major traditions of work and the newest perspectives, concepts, insights, and research-based knowledge concerned with teachers and teaching. Many of the chapters discuss developments that are international in scope, but coverage is also provided for education in a number of specific countries. Many chapters also review contemporary problems faced by educators and the dangers posed by recent, politically-inspired attempts to 'reform' schools and school systems. The Handbook provides an invaluable resource for scholars, teacher-educators, graduate students, and all thoughtful persons concerned with the best thinking about teachers and teaching, current problems, and the future of education.

Schooling and Social Change in England since 1760 offers a powerful critique of the situation of British education today and shows the historical processes that have helped generate the crisis confronting policymakers and practitioners at the present time. The book identifies the key phases of economic and social change since 1760 and shows how the education system has played a central role in embedding, sustaining and deepening social distinctions in Britain. Covering the whole period since the first industrialization, it gives a detailed account of the development of a deeply divided education system that leads to quite separate lifestyles for those from differing backgrounds. The book develops arguments of inequalities through a much-needed account of the changes in education. This book will be of great interest for academics, scholars and post-graduate students in the field of history of education and education politics. It will also appeal to administrators, teachers and policy makers, especially those interested in the historical development of schooling.
