Microbiology is an engaging textbook presenting balanced and comprehensive account of major areas of microbiology in the form of questions and answers. This question- answer approach to present complex topics and theories of microbiology regarding cellular and non-cellular microorganisms, microbial genetics and molecular biology in higher plants and animals, makes the subject interesting and easily comprehensible for the students.

Provides an extensive subject review of test topics, practice questions, and two full-length practice tests.

Winner of the 2015 NAGC Curriculum Studies Award Interactions in Ecology and Literature integrates ecology with the concept of interactions and the reading of fictional and informational texts. This unit, developed by Vanderbilt University's Programs for Talented Youth, is aligned to the Common Core State Standards for English Language Arts and Next Generation Science Standards. Students will research questions such as "Should animals be kept in zoos?" and "Should humans intervene to control overpopulation of species?" They will examine relationships among living things and the environment as well as relationships between literary elements in texts through accelerated content, engaging activities, and differentiated tasks. Ideal for gifted classrooms or gifted pull-out groups, the unit features fictional texts from Lynne Cherry, Katherine Applegate, and Jacqueline Woodson; art from Mark Rothko and Georges Seurat; informational texts about deforestation and a variety of animals; biographies about Michael Jordan, J. K. Rowling, and Walt Disney; and videos about food chains, food webs, and more.

Eleven iconoclastic scholars take aim at many of the accepted interpretations of the Civil War North in this provocative new anthology

Explains parasite biology as a branch of ecology - essential reading for zoology and ecology students.

I wanted to make sense of my life in organisations. I needed to understand why people behaved the way they did and why management theory was not providing the answers. So I turned to nature and discovered symbiotic relationships; I turned to philosophy and found questioning of the fundamental presuppositions of management theory; I turned to myself and found a slave to convention. We need to awaken from that slumber occasioned by conventional thinking. This book is a war cry to everyone in business to tell it like it is. Privilege your own experiences and relationships and contribute towards others understanding. Through dialogue and conversation we can create new meaning. Relationship defines who we are. The book itself is the result of cooperative interaction with many others and faithfully demonstrates the messiness of being human; a fact we seem to deny in organisational life. This book will appeal to those with rebellion in their heart who want to make a difference at work, but are intimidated and constrained in doing so by official ideologies.
