the following effects: Increased physical and mental fatigue due to reduced blood flow to your muscles, brain and organs. Reduced muscle performance due to dehydration caused by an increase in perspiration.

Health and Safety: Hot Work Environment - Canada.ca

Extremely hot environments include a high temperature and high humidity that together change the actual heat felt by the worker which can eventually lead to heat stress symptoms. Heat stress can then cause multiple symptoms in the body followed by serious and fatal illnesses that require immediate medical attention.
