Vibrations and Waves PROBLEM SOLUTIONS 13.1 (a) Taking to the right as positive, the spring force acting on the block at the instant of release is $F_{\text{spring}} = -kx = -130 \text{ N/m} \cdot 0.13 \text{ m} = -17 \text{ N}$ or 17 N to the left (b) At this instant, the acceleration is $a = \frac{F}{m} = \frac{-17 \text{ N}}{0.60 \text{ kg}} = -28 \text{ m/s}^2$ or 28 m/s^2 to the left 13.2 When the object comes to equilibrium (at distance $y = 0$)

Vibrations and Waves - Mosinee, WI

Vibrations and waves are everywhere. If you take any system and disturb it from a stable equilibrium, the resultant motion will be waves and vibrations. Think of a guitar string—pluck the string, and it vibrates. The sound waves generated make their way to our ears, and we hear the string's sound.
