VISUAL INTELLIGENCE: SHARPEN YOUR PERCEPTION, CHANGE YOUR LIFE By Amy E. Herman *Excellent Condition*.

An engrossing guide to seeing—and communicating—more clearly from the groundbreaking course that helps FBI agents, cops, CEOs, ER docs, and others save money, reputations, and lives. How could looking at Monet's water lily paintings help save your company millions? How can checking out people's footwear foil a terrorist attack? How can your choice of adjective win an argument, calm your kid, or catch a thief? In her celebrated seminar, the Art of Perception, art historian Amy Herman has trained experts from many fields how to perceive and communicate better. By showing people how to look closely at images, she helps them hone their "visual intelligence," a set of skills we all possess but few of us know how to use properly. She has spent more than a decade teaching doctors to observe patients instead of their charts, helping police officers separate facts from opinions when investigating a crime, and training professionals from the FBI, the State Department, Fortune 500 companies, and the military to recognize the most pertinent and useful information. Her lessons highlight far more than the physical objects you may be missing; they teach you how to recognize the talents, opportunities, and dangers that surround you every day. Whether you want to be more effective on the job, more empathetic toward your loved ones, or more alert to the trove of possibilities and threats all around us, this book will show you how to see what matters most to you more clearly than ever before. Please note: this ebook contains full-color art reproductions and photographs, and color is at times essential to the observation and analysis skills discussed in the text. For the best reading experience, this ebook should be viewed on a color device.

"Sharp and original, this book should alter how readers look at the world." --Kirkus Reviews "Visual Intelligence will guide you to be a more critical observer of what is before you without making those inadvertent assumptions that may sabotage your work." --John J. Sprague, inspector, commanding officer, Force Investigation Division, NYPD How could looking at Monet's water lily paintings help save a company millions? How can noticing people's footwear foil a terrorist attack? How can your choice of adjective win an argument, calm your children, or catch a thief? In her celebrated seminar, The Art of Perception, art historian Amy Herman has trained experts from many fields to perceive and communicate better. By showing people how to look closely at images, she helps them hone their "visual intelligence," a set of skills we all possess but few of us know how to use effectively. She has spent more than a decade teaching doctors to observe patients instead of their charts, helping police officers separate facts from opinions when investigating a crime, and training professionals from the FBI, the State Department, Fortune 500 companies, and the military to recognize the most pertinent and useful information. Her lessons highlight far more than the physical objects you may be missing; they teach you how to recognize the talents, opportunities, and dangers that surround you every day.

An engrossing, eye-opening guide to seeing and communicating more clearly, from the groundbreaking course that helps FBI agents, cops, CEOs, military Special Forces, ER docs, and others save money, reputations, and lives"

Reveals the way the human eye acts on the visual world not just to represent but to actively construct the things we see, outlining the rules of vision and their application in art and technology. Reprint.

With Amy Herman's Fixed., we now have access to what the FBI, NATO, the State Department, Interpol, Scotland Yard, and many more organizations and their leaders have been using to solve their most intractable problems. Demonstrating a powerful paradigm shift for finding solutions, Herman teaches us to see things differently, using art to challenge our default thinking and open up possibilities otherwise overlooked. Her unexpected, insightful, and often delightful methodology is sought after by leaders and professionals for whom failure is catastrophic. Luckily for us, these tactics work— no matter the problem's scale or complexity. And we don't need an art degree or previous knowledge about art to benefit from her approach, only a willingness to open our eyes and our minds. Yes, things go wrong all the time. What matters most is what we do to fix them.

Cuts across perceptual psychology, art, television, film, literature, advertising, and political communication to give the reader critical insight into the holistic logic and emotional power of the images that dominate our lives.

I Spy and Where's Waldo? get a revolutionary twist in this self-directed, interactive book that teaches young readers how to fully engage their brains to think critically and creatively. What would you say if I told you that looking at art could give you the confidence you need to speak up in class? Or that learning the history of donuts could help you think like a super spy and train like the CIA? smART teaches readers how to process information using paintings, sculptures, and photographs that instantly translates to real world situations and is also fun! With three simple steps (1) How to SEE, (2) How to THINK about what you see, and (3) How to TALK about what you see, readers learn how to think critically and creatively, a skill that only requires you to open your eyes and actively engage your brain.

"Image Studies provides an engaging introduction to visual studies analysis and an account of existing and emergent visual culture debates, along with chapters on a range of topics, including: consumer culture and identity, photography and digital imaging, painting and drawing; the moving image; the relationship between image and text (including reference to text in art, comics and animation); and scientific imaging.Written in an engaging and accessible way, the text will also include extracts of existing critical materials. Each chapter will include key set readings, including short extracts from existing literatures with accompanying study notes and questions. The chapters will also include a range of critical and creative tasks, designed to bring the academic study of visual culture into direct contact with practical aspects of visual culture and image-making.Image Studies is a new text aimed predominantly at undergraduate students in visual culture, but which will also be useful for media studies students and arts students more generally"--

James Elkins's How to Use Your Eyes invites us to look at--and maybe to see for the first time--the world around us, with breathtaking results. Here are the common artifacts of life, often misunderstood and largely ignored, brought into striking focus. With the discerning eye of a painter and the zeal of a detective, Elkins explores complicated things like mandalas, the periodic table, or a hieroglyph, remaking the world into a treasure box of observations--eccentric, ordinary, marvelous.

Written for anyone beginning a research project, this introductory book takes you through the process of analysing your data from start to finish. The author sets out an easy-to-use model for coding data in order to break it down into parts, and then to reassemble it to create a meaningful picture of the phenomenon under study. Full of useful advice, the book guides the reader through the last difficult integrating phase of qualitative analysis including diagramming, memoing, thinking aloud, and using one's feelings, and how to incorporate the use of software where appropriate. Ideal for third year undergraduate students, master students, postgraduates and anybody beginning a research project, the book includes examples covering a wide range of subjects - making the book useful for students across the social science disciplines. Hennie Boeije is currently an Associate Professor with the Department of Methodology and Statistics of the Faculty of Social and Behavioural Sciences at Utrecht University, The Netherlands.
