Once again, Volvo was at the forefront of safety standards in the vehicle industry.

The XC90 was also specifically designed to maneuver like a car but provide the same cargo capacity as a wagon. In 2004, the XC90 was given a new engine option.

This was the V8 engine. It was the first

respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of

vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations
