This book is the perfect complement to the Excel or Access Comprehensive texts, particularly for instructors looking for more complex, real world cases for students to work through. Included are 15 total cases (6 Excel, 6 Access, and 3 integrated). Real world problem solving for business and beyond The Your Office series prepares students to use both technical and soft skills in the real world. Hands-on technical content is woven into realistic business scenarios and focuses on using Microsoft Office® as a decision-making tool. The series features a unique running business scenario that connects all of the cases together and exposes students to using Office to solve problems relating to business areas like finance and accounting, production and operations, sales and marketing. Each chapter introduces a realistic business case for students to complete via hands-on steps that are easily identified in blue shaded boxes. Each blue box teaches a skill and comes complete with video and interactive support. Chapters are grouped into Business Units, which collectively illustrate a specific set of business concepts to achieve AACSB-related outcomes. Each Business Unit ends with a Capstone section, testing students' ability to apply concepts and skills beyond a single chapter. For introductory courses in Microsoft(R) Office. Seamless digital instruction, practice, and assessment For over 17 years, instructors have relied upon the GO! series to teach Microsoft Office successfully. The series uses a project-based approach that clusters learning objectives around projects, rather than software features, so students can practice solving real business problems. Gaskin uses easy-to-follow Microsoft Procedural Syntax so students always know where to go on the ribbon; she combines this with a Teachable Moment approach that offers learners tips and instructions at the precise moment they're needed. Updated to Office 365, GO! with Microsoft(R) Office 365(R), 2019 Edition, Getting Started adds tips for Mac users, revised instructional projects, and improved coverage of the what, why, and how of skills application. Also available with MyLab IT By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. MyLab IT 2019 delivers trusted content and resources through an expansive course materials library, including new easy-to-use Prebuilt Learning Modules that promote student success. Through an authentic learning experience, students become sharp critical thinkers and proficient in Microsoft Office, developing essential skills employers seek. For introductory computer courses on Microsoft Office 2010 or courses in computer concepts with a lab component for Microsoft Office 2010 applications. Your Office is the Office Applications textbook written for instructors who want more than a 'skill & drill' book that enables students to learn discreet tasks but fails to illustrate the big picture of how these skills work together. Your Office bridges the gap between skill and application, and empowers students to master Office 2010 as a tool to solve problems and make decisions. The cases progress students from learning the skills in each Office Application to using the applications as tools to make business decisions. The unique modular structure provides a strong foundation for students through practice in each workshop and then synthesizes the objectives covered over two workshops, challenging students to really retain what they learned as opposed to learning and then forgetting soon after. The series scenario introduces a large global business (the resort and spa) made up of smaller businesses (golf pro shop, spa, restaurants, event planning, etc) featured in the cases that run throughout all four applications. This approach gives students a solid understanding of how an organization works by exposing them to how individuals in all facets of a business interact with tools like Microsoft Office and use information to make decisions.
